Long Term Civilisation Plan 2032 to Infinity

Solve Existential Threats of Life on Earth to ensure longevity of human civilisation. Consider that Earth is a water planet with a history of being frozen or melted, pelted by space rocks, ionized by solar mega flares, CME's and even micro nova events. It's sky's blocked out by volcano eruptions, it's oceans pushed over entire continents from radical earthquakes and the poles re-positioning.

- Do you have children or want to have children? If yes, what is more important; intermittent retirement or flexible work life balance?
- Is free childcare important to you?
- What do you think about the concepts of intermittent retirement versus parental/maternity leave?

ASSOCIATE NETWORKS

- What professional and social groups or associations are you a member of?
- Do you have any special associates who might be well placed to support the 500 Queens Initiative?
